

Installation Instructions for 41700, 41701, 41705 & 41706

JEGS Digital Gauge Bezels Note: Gauge Panels Sold Separately

Installation Instructions:

1. Install four(4) 1/4"-28 x 1" set screws into the outer tapped holes on the bezel and tighten. Note the orientation of the bezel.

Turn signal holes

2. Place the gauge lens into the recessed portion of the bezel. Note the orientation of the lens.

Trip reset hole

3. Screw four(4) #6-32 x 1-1/4" set screws into bezel through lens and tighten.

4. Place the four(4) **LONG** spacers from the digital gauge panel kit over the #6-32 set screws.

5. Slide the digital gauge panel circuit board over the #6-32 set screws **EVENLY**. Set screws may need to be pulled or pushed to align circuit board. Be sure to guide the trip reset button through the lens to ensure it doesn't bind.

6. Place the four(4) **SHORT** spacers from the digital gauge panel kit over the #6-32 set screws.

7. Secure the circuit board using the four(4) small nuts from the digital gauge panel kit.

8. Using the included 1/4" washers and nuts secure the bezel to your dash panel.

Bezel to Dash Panel Mounting Spacing:

41700 & 41701 = 3-1/4" High x 6" Wide

41705 & 41706 = 3-1/2" High x 10" Wide
